

Roberts Creek Water District  
Superintendents Report  
December 2020

The County has requested payment for our portion of the Carnes Rd. Project. Knife River has started the project and we remain ready to assist with any conflicts that arise.

We had a mechanical seal fail on one of our filtrate pumps. It was repaired by Beckwith & Kufell and is working great.

We had a failure in a joint on our CIP line, it was repaired by the crew. We are looking into costs to replace more of the plastic pipe with stainless steel, as we have in the past.

Our power study should be ready soon, so we will know exactly what backup generator we will need for the plant.

We have finally been contacted by the State regarding our emergency response trailer, that was awarded through a SPIRE grant. We should know more within the next few weeks.

We are dealing with new temporary rules from OSHA regarding COVID-19. We have completed the required assessments, protocols and procedures, as well as continued training and discussions with all employees. This has changed how tasks get completed, but I believe we are doing a good job of safely getting work done, while also giving good service to our customers.

**If you have any questions, please feel free to give me a call at 541-670-1215**  
**Thanks Alan**
