

Green Area Water & Sanitary Authority
Superintendents Report
September 2021

We are still on schedule for our membranes to pass through customs September 16th. We will coordinate with the Dupont representative for installation, once we have them onsite.

The mainline extension for the 265 Grant Smith project should start this week. We will be inspecting this project and coordinating a planned mainline tie-in with the contractor.

Staff will be involved with various training classes this month. We have employee's receiving C.E.U's for their Backflow Inspector Certifications, as well as First Aid Training for the entire staff and an Asbestos refresher course for some of our field crew.

The crew has been busy repairing leaks and we are working on some small projects around the treatment plant. We will be working on some facility maintenance at the Highlands pump station as well.

We are still currently receiving water from Ben Irving Reservoir. So far we have used 88,169,222 gallons since July 26th.

If you have any questions, please feel free to give me a call at 541-670-1215
Thanks Alan
